

**OPERATORS:**

**THIS ORAL REVIEW MAY BE USED TO MEET THE REQUIREMENTS OF R.61-106, SECTION 2.3.4. Operator must read every statement and question to consumer. Documentation of the oral review must be made, preferably on client's card.**

**ORAL REVIEW FOR INITIAL VISIT**

*Operator Use Only*

1. If you do not tan in the sun, you are unlikely to tan in a tanning bed.
2. There are risks associated with tanning. UV exposure may cause skin cancer, allergic reactions and/or chronic skin damage such as wrinkling, dryness, and bruising of the skin.
3. Do you have any history of skin problems or sensitivity to sunlight? (If YES, advise client to consult a doctor BEFORE allowing him or her to tan.)
4. There are some cosmetics, foods, and medicines that can cause sensitivity to sunlight. Are you taking any medications? ( If YES, check medications list and/or call doctor or pharmacist.) You must advise us of any change in your medications.
5. Have you tanned outdoors or at another salon today? Tanning more than once in 24 hours is hazardous to your health and is prohibited. (If client has tanned today, you **must not** allow him/her to tan in your salon for at least 24 hours.)
6. If you are pregnant or taking birth control pills, you may develop discolored skin.
7. You are required to wear FDA approved eyewear while tanning. Severe burns or longterm injuries to your eyes may occur if you don't.
8. I will show you how to use the tanning bed (booth).
9. Tanning is a gradual process and you may have to make several visits before you notice any skin darkening.
10. Here is the manufacturer's exposure schedule for the bed (booth) you will be using. (Operator must show client manufacturer's exposure schedule.)
11. If you exceed the manufacturer's exposure schedule there are increased health risks such as burning, skin cancer, premature skin aging, and allergic reactions. DHEC strongly discourages exceeding the manufacturer's exposure schedule for exposure times, number of visits per week, and spacing of visits. Do you understand the risks associated with exceeding the exposure schedule?
12. Are all the answers to the questions on the client card correct?
13. Please let me know if you have any redness, burns or discomfort after your session.
